EpelSoft LABEL

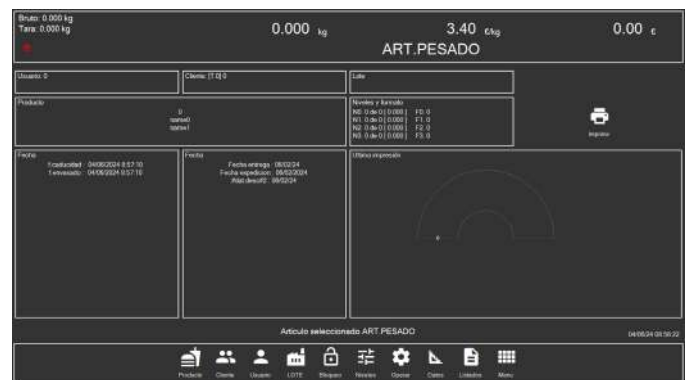

EpelSoft LABEL

EPELSoft Label represents the cutting edge of product labelling management in industrial environments, offering a comprehensive and efficient solution from the convenience of a PC. This software not only redefines standards of labelling accuracy, but also stands out for its ability to adapt to the varied needs of industry, providing companies with an essential tool to optimise their processes.

The EPELSoft Label experience starts with its ability to operate on touch terminals, enabling fast and accurate labelling. This intuitive approach ensures that staff can generate labels efficiently, reducing operating times and improving overall process productivity.

At the heart of EPELSoft Label lies its versatility, which manifests itself through multiple labelling options. From fast-moving products to those requiring more detailed labelling, this software adapts to the specific needs of each company, providing flexibility that is essential in dynamic industrial environments.

Time optimisation is an undeniable priority in industry, and EPELSoft Label addresses this challenge with intelligent solutions. The tool facilitates traceability and batch management, enabling companies to efficiently track products, improve quality control and comply with industry regulations.

Options

Connected to any GODEX labelling machine model, it allows us to have multiple labelling options depending on the model chosen.

General

- » **Fast Labelling:** Use of touch terminals for agile labelling.
- » **MultiTerminal:** Offers several devices to work as a single unit sharing the database.
- » **Accurate Labelling:** Allows products to be labelled within established weight margins, ensuring accuracy and makes a record of labelled production.
- » **Time Optimisation:** Improves work efficiency through traceability and batch management.
- » **Adaptability:** Compatible with different labelling machine models, providing flexibility. Range of labellers from 2" to 6".
- » **Intuitive Design:** Native labeller editor for easy and customised label design.
- » **Custom Modifications:** Possibility of customising the label format per customer and per item. It also allows the printing of multiple codepages (Cyrillic, Arabic, Greek, etc.), and allows their storage in the article cards with a copy/paste.
- » **Detailed listings:** Organisation by batch, item, customer, etc., for complete management. They can be purchased with an additional licence.
- » **Print quality and barcodes:** Allows logos to be associated with formats and products. You can program the nutritional and allergens of the product and various types of barcodes (1D and 2D). EAN13, EAN128, QR, DATAMATRIX, ITF14, CODE39...

Options labels and logos

In short, EPELSoft Label is not just a labelling software, it is a complete solution that boosts efficiency, accuracy and adaptability in industrial environments. With an intuitive design, customisation options and the ability to make modifications on demand, this software is positioned as the essential tool for those looking to optimise their labelling processes and raise the quality of their products in the industry.

Tactile, fast and agile

EPELSoft Label is a software designed to efficiently manage product labelling from a PC. This versatile program is designed to operate on touch terminals, providing speed and agility in the labelling process. However, its flexibility also allows its use on a conventional PC with keyboard and mouse. When installed on the CT12 indicator, it transforms into a touchscreen indicator with approved weight, offering a complete solution. EPELSoft Label integrates seamlessly with various models of GODEX labellers, providing a variety of labelling options depending on the model chosen. In addition, the ability to connect to any electronic scale makes it easy to accurately capture product weight, even if it is not mounted on a CT12.

Editing data

Technical data Technical characteristics

- » Allows to have auxiliary labellers configured to print Total labels, for different levels (For example: Product label, case, pallet and truck). Conexión Ethernet o RS232.
- » the top panel of the programme always shows the information of the currently selected product:
 - Gross weight, Net weight, Tare.
 - Price, Amount.
 - Dates, Batch, Customer, Format ...
 - Levels of totals.
- » The products are grouped into families. For quick selection on the screen. A list display is also available for you to choose from.
- » Editing of data sheets allowing to modify or create new ones:
 - Products
 - Families
 - Customers
 - Users
 - Traceability
 - Scale Conf
- » Level management: weighing on each level, deleting weighing, printing of level labels manually.
- » Manual or automatic labelling.
- » Batch by item, general or force confirmation before starting.
- » Export and import of data in .csv format.
- » Acces or MySQL (MySQL allows multiple devices to be connected if they are over Ethernet).
