INTRODUCTION

EPELSoft Software Range from Epelsa

Epelsa presents its advanced EPELSoft software range, designed to meet the needs of both the retail and industrial sectors. Our technological solutions integrate efficiently with displays, scales, mobile devices, PCs and touch screens, providing essential tools for weighing, labelling and process control management.

Advantages of EPELSoft:

- **Versatility:** Compatible with multiple devices.
- **Efficiency:** Optimises industrial and retail operations.
- **Accuracy:** Ensures rigorous control at all stages of the process.
- **Adaptability:** Adjusts to the specific needs of each customer.

EPELSoft transforms your operations, offering solutions that not only improve efficiency, but also guarantee the precision and adaptability necessary in dynamic industrial and retail environments.

Explore how EPELSoft can transform your operations, improving the productivity and precision of your business.

Remote management software for weighing systems

Power and dynamism for your business in just one click

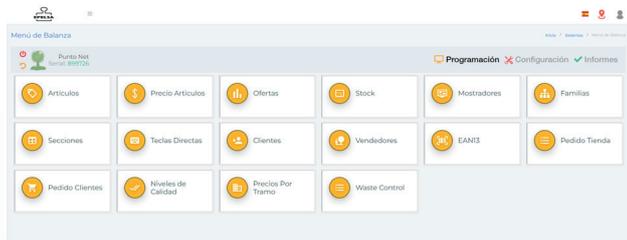

EpeISoft NAUTILUS is advanced software for managing and controlling PC Range scales (TouchScale and K-Scale) using web technology, accessible from anywhere with an internet connection.

Key Features:

- › **Remote access:** Remote scale management via web browser.
- › **Multi-platform:** Compatible with PC TouchScale and K-Scale scales.
- › **Cloud storage:** Data protected and accessible from any device.
- › **Platform independence:** No software installation required.
- › **Real-time updates:** Changes visible instantly when the network is online.
- › **Security:** Data protection against potential malfunctions.
- › **Ease of use:** No complicated configuration; changes can be managed from the platform.
- › **Multi-store and multi-user:** Access to multiple stores and systems, with different users and permissions.
- › **No fixed IP required.**
- › **Renewable annual licence per store.**

NAUTILUS facilitates the programming, configuration, and monitoring of your scales, ensuring an efficient and secure connection to the cloud. Ideal for improving the operational efficiency and data security of your business.

Simplification of communication and scale management

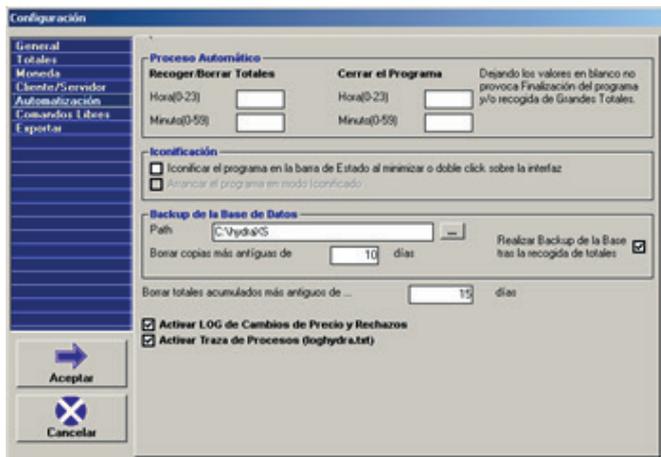

Comprehensive management for TouchScale XS scales

HydraXS is software for centralised data management in retail weighing systems. It is specifically designed to connect TouchScale XS scales to a central system, ensuring efficient and continuous communication in environments with multiple points of sale. Its advanced architecture allows information to be managed in an orderly and accessible manner, optimising day-to-day operations.

Key Features:

- › **Continuous Ticket Collection:** Automatically captures tickets generated by scales and stores them in a central database.
- › **Data Export and Import:** Supports ASCII formats to facilitate integration with other management systems.
- › **Centralised Item and Price Management:** Updates prices, VAT rates and barcodes quickly and accurately, maintaining consistency across all points of sale.
- › **Total and Statistics Queries:** Generates detailed reports on sales by item, salesperson or department, applying customised filters.
- › **Customer and Discount Control:** Manage customer information and configure specific discounts to optimise your loyalty strategy.
- › **Multi-Store Communication:** Hydra XS allows you to manage multiple points of sale from a single system, consolidating information to obtain a global view of the business.

Tags for weighing scales XS

Advanced software designed for creating and customising labels in retail weighing systems.

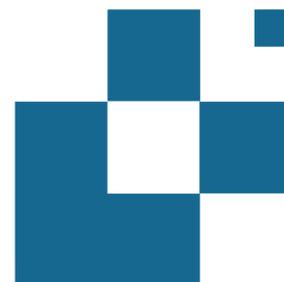

Encase XS allows you to design fully customised labels according to the needs of each business. With this tool, you can create weight, total and additional information labels, adapting to different formats and regulations. Its ability to generate dynamic labels ensures a clear and consistent visual presentation in any situation.

Furthermore, its ability to integrate barcodes and graphic elements facilitates regulatory compliance and accurate product identification, optimising workflow at the point of sale.

Key Features:

- › **Intuitive interface:** The application has a simple and practical visual environment, allowing you to quickly design and modify labels without the need for advanced technical knowledge.
- › **Export:** Save labels in XML format, ensuring compatibility with other systems and facilitating migration and secure storage of designs.
- › **Customisation:** You can add and modify elements such as text, barcodes, logos, lines, boxes and stamps. It also allows you to adjust the alignment, size and style of each element to create customised and attractive labels.
- › **Quick editing:** It includes practical tools such as copying, pasting and modifying elements with ease, saving time when designing new labels or updating existing ones.
- › **Barcode:** It is compatible with the most commonly used formats in the retail sector, such as EAN8, EAN13 and CODE128, ensuring seamless integration with scanning and product management systems.
- › **European regulations:** Labelling adapted to EU Regulation 1169/2011, including nutritional information and traceability, providing consumer confidence.

ENCASE EpelSoft

Encase EpelSoft

Perpetual Licence

Software for designing tickets, labels, price tags and invoices

Fully customisable, from content to design, directly from your TouchScale scales.

Do you need your labels to show exactly what your business and regulations require? Encase is the label design software that comes integrated in all Epelsa TouchScale and K-Scale scales, allowing you to create and edit receipts, labels, price tags and invoices quickly and accurately.

Key Features:

- › **Intuitive interface:** Drag, resize or change styles with ease, without the need for advanced technical knowledge.
- › **Customised design in seconds:** Create the document you need with visual freedom and adapt each element.
- › **All types of labels:** Product, total, by weight or by units, as well as receipts and invoices.
- › **Dynamic and visual content:** Integrate logos, fixed texts, sales variables, nutritional information, traceability, allergens or even QR codes and barcodes (EAN-8, EAN-13, Code128).
- › **Quick editing:** Copy, paste, modify and update elements quickly, saving time on new designs.
- › **Smart printing:** Display only the necessary information for each product, optimising the space on the label or document.
- › **Export to XML:** Ensures compatibility, easy migration and secure storage of designs.
- › **Direct sending to scales:** Transfer labels quickly via software or FTP.
- › **European regulations:** Adapted to EU Regulation 1169/2011, it includes specific functions to highlight allergens and comply with food labelling regulations.

SQUIRREL

EpelSoft

Squirrel EpelSoft

Ref.000119091058

Annual Licence

Translate, interpret and transmit data without errors

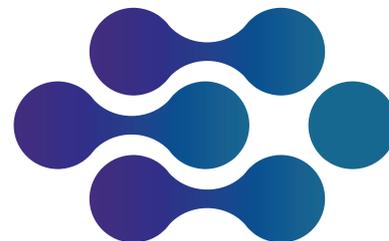

It automates processes, adapts to your way of working, and can withstand power outages.

Squirrel is desktop software developed by Epelsa that allows you to easily import and export information, acting as a direct bridge between your PC (ERP) and the server scale via Rest API or Nautilus software. (Depending on your choice)

Key Features:

- › Connect ERP-scales via Rest API or Nautilus plugin.
- › Allows you to create and manage the structure of shops, counters and scales from a single software.
- › Data import and export
- › Flexible export modes:
- › Process automation: sending and receiving data without manual intervention, optimising time and reducing errors.
- › Detailed logging system that shows the status and results of imports, exports and communication with scales.
- › Real-time monitoring: status of each scale (disconnected, connected, operational, with compatible API, etc.).
- › Technical compatibility:
- › Windows 10.
- › MariaDB database.
- › Integration with TouchScale's own API.
- › Multilingual.
- › Multi-store system with additional licences for each store.

DESKTOP EpeIsoft

Desktop EpeIsoft

Ref. 000119091021
Perpetual Licence

Remote and intelligent management for your PC scale

Full control from your computer over products, sales, stock, promotions and much more in real time.

Desktop is an application designed to create a direct and functional link between the PC scale (TouchScale/K-Scale) and your computer, allowing you to manage key information from your scale remotely, quickly and easily.

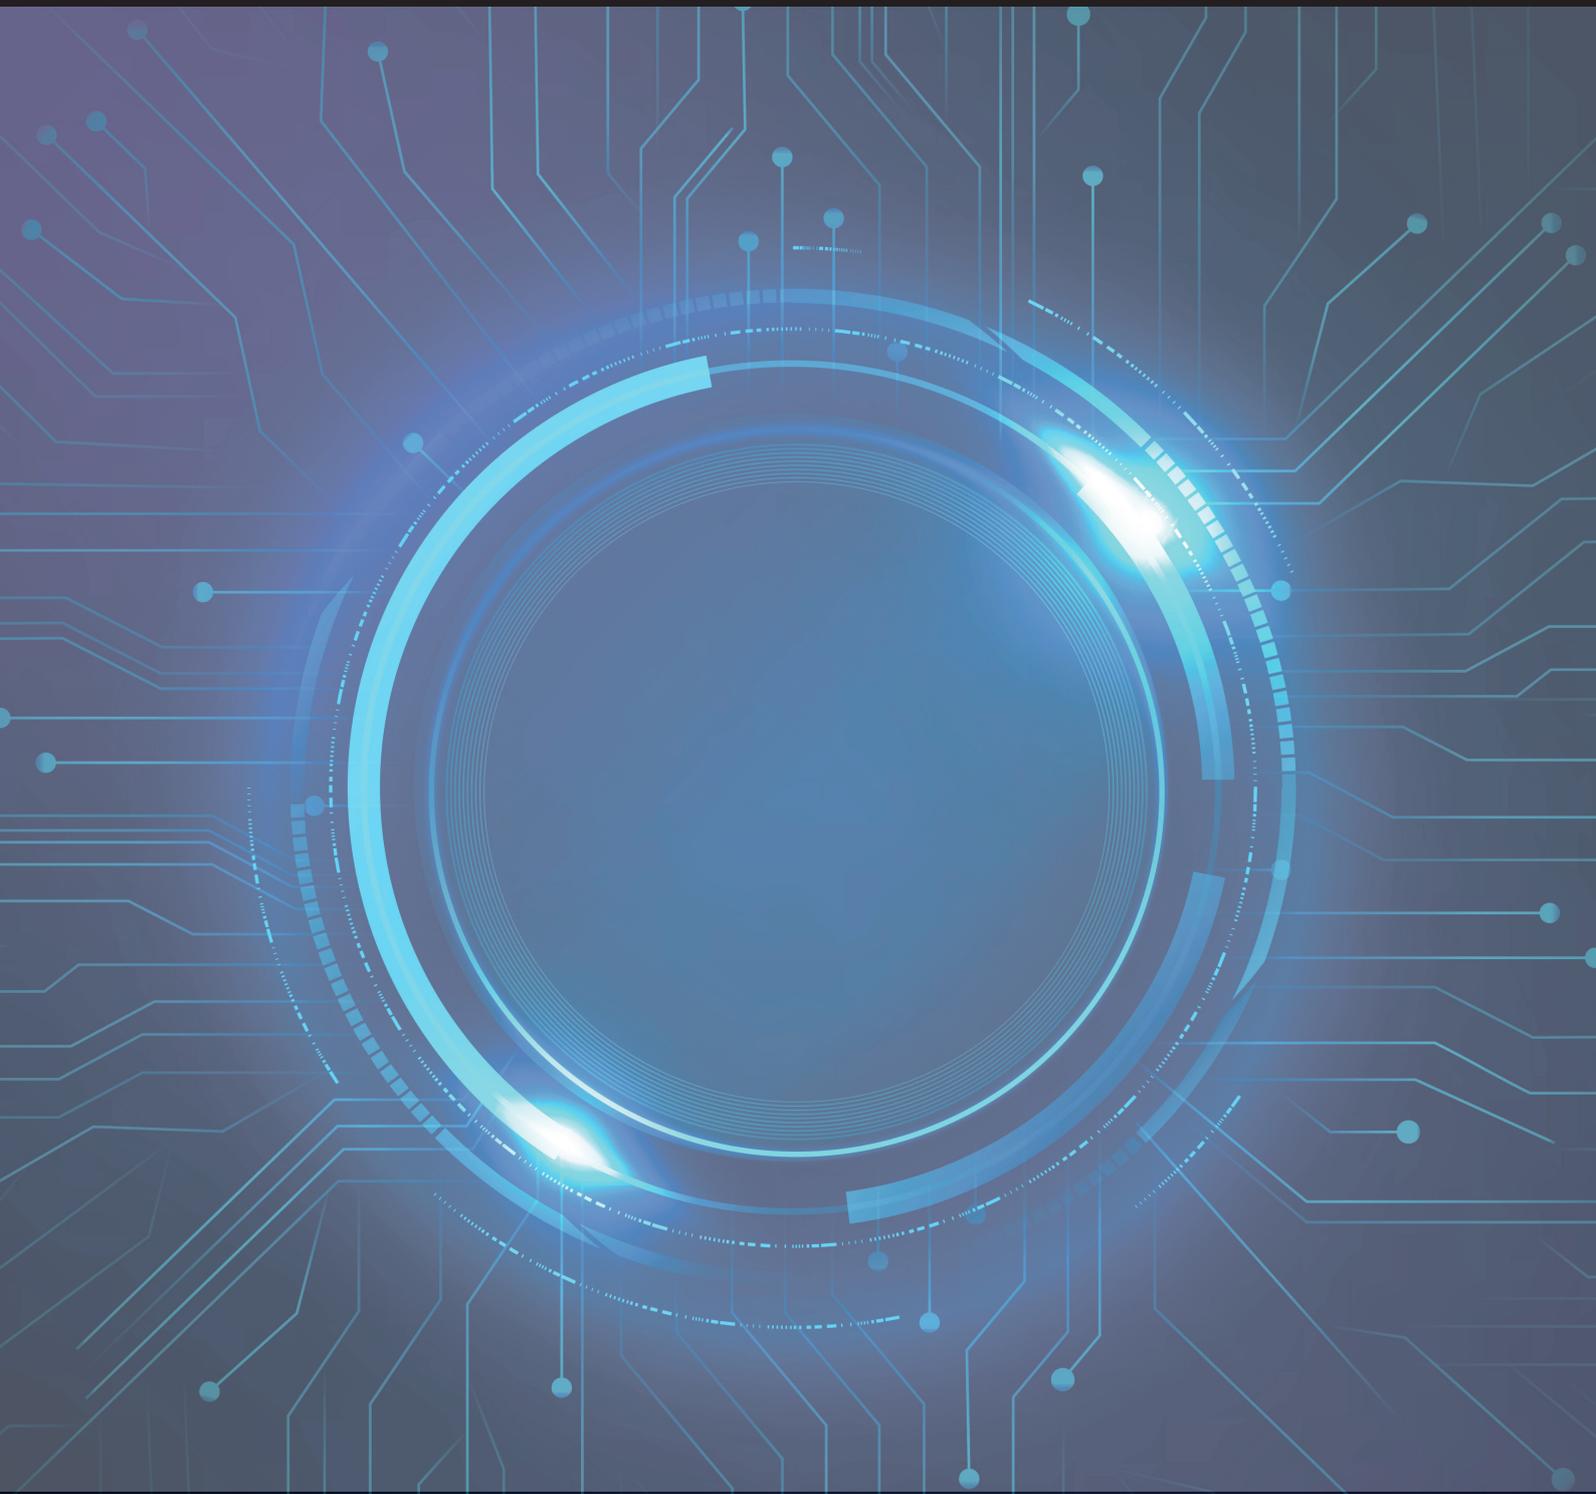

From editing products and prices to tracking sales or managing visual campaigns, Desktop offers you an intuitive tool that replicates the aesthetics and functions of the scale, so you don't have to learn two different environments.

Software designed to optimise your daily processes, improve point-of-sale control and give you a clear view of your business, all in real time and from a single location.

Key Features:

- › Product and price management: item scheduling, pricing, VAT, payment methods, etc.
- › Reports and statistics
- › Real-time synchronisation and connection
- › Loyalty and marketing tools
- › Configuration and security: users, licences, access, backups, etc.
- › Traceability and labelling
- › Intuitive and functional design.

Vehicle weighing management

Optimised and efficient industrial weighing management

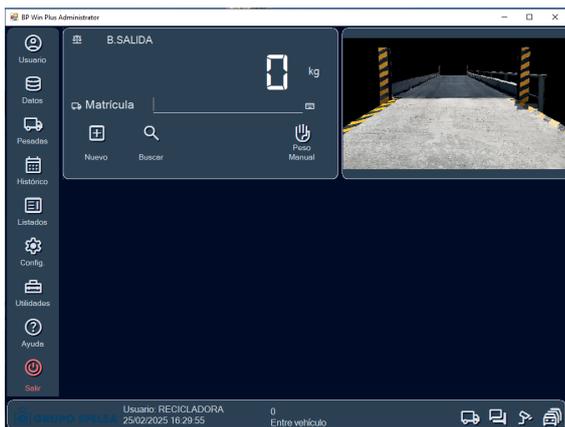

BP-Win+ is a weighing control and monitoring application for weighbridges that provides users with easy access to weighing information generated when heavy vehicles pass over the weighbridge.

Key Features:

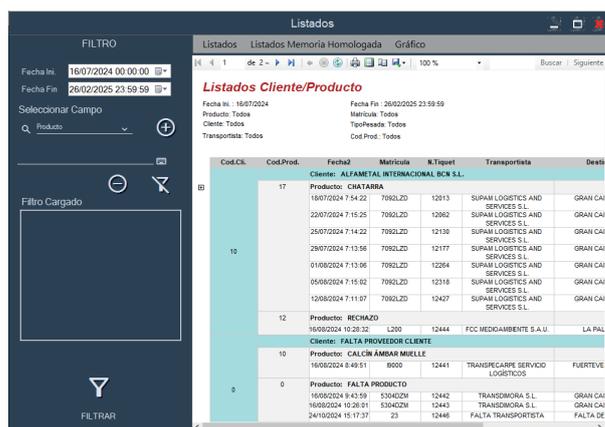

- › Compatible with touch screens and BP terminals.
- › Allows you to work with normal and touch screens.
- › Automation, fewer unnecessary steps and greater speed.
- › Better language management.
- › New customised list design, more visual and easier to interpret.
- › Price and tax registration for products.
- › Allows customised exports.
- › Filtering of weighings by plant within the company, according to their location.
- › Improved email management.
- › Introduction of the concept of "shift".
- › New p1p and p2p columns.
- › Customised and automatic listings.

Advantages

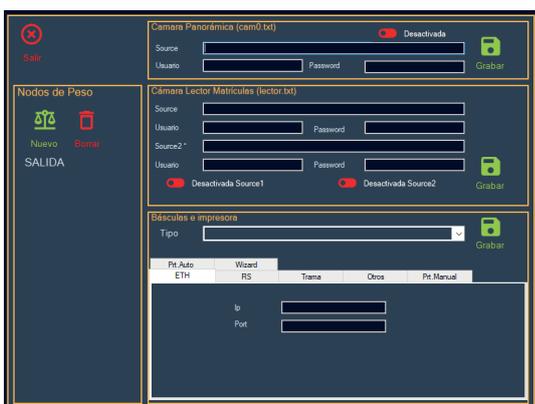

- › Multi-user access.
- › Compatibility and Ethernet/RS232/RS422 connection.
- › Automation and control.
- › Data flexibility.

EpelSoft PAY-TERMINAL

Pay - Terminal

Ref.: 0018910792

Perpetual licence. Annual maintenance

Automation and secure payment

The ideal solution for autonomous weighing with electronic payment integration

The PAY-TERMINAL is a self-service terminal designed to simplify the weighing and payment process based on weight. This equipment allows users to weigh their products and make payment by bank card independently and with guidance, without the need for assistance. Local councils can thus offer an efficient and secure public service, reducing operating costs and minimising the risk of fraud by eliminating the need for operators and accepting electronic payments.

Key Features:

- › **Full automation:** Calculates rates and manages payments autonomously, integrating card payments.
- › **Intuitive interface: Guides users step by step via a colour touchscreen.**
- › **Internet connection:** Support for LAN networks and 4G connection, ensuring accessibility and remote monitoring.
- › **Repeater mode:** A version designed to be integrated into already installed scales with current certification.
- › **Event log:** Automatic log of operations and incidents, accessible from the device or via the web.
- › **Customer management:** Advanced account management with balance top-ups, PIN control and email notifications.
- › **Versatility:** Compatible with truck scales and other applications, such as weighing luggage at airports.
- › **Operational efficiency:** Reduces costs, improves security and optimises time usage with its practical design.

Annual maintenance plan:

- › Remote configuration and resolution of technical incidents, avoiding travel.
- › Free software and firmware updates for the device, without the need for physical intervention.
- › Specialised support for distributors.

DRIVER EpeSoft

EPELSOFT
DRIVER

Ref.: 0018910793

Perpetual Licence

Multi-scale management

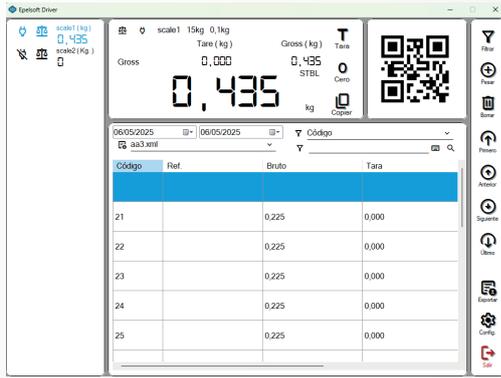

Optimise the control of vehicles and goods with a flexible, secure and traceable system, compatible with Epelsa industrial terminals and displays.

It is a desktop application for Windows developed by Epelsa for the management and supervision of multiple scales connected to a computer system. This software allows scales to be integrated with customer management systems, ensuring reliability, traceability, and efficiency in all weighing processes.

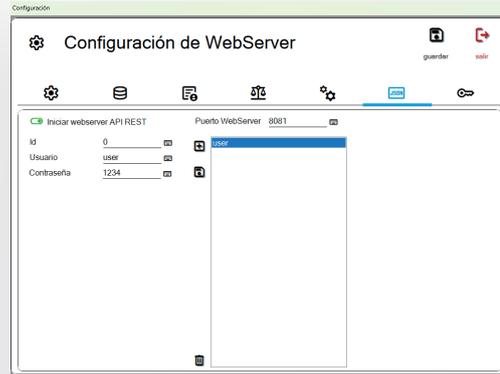

EpelSoft DRIVER facilitates daily work by centralising the control of scales from a single point.

Key Features:

- > Simultaneous management of multiple scales
- > Simultaneous connections
- > Rest API integrated into the system for communication with ERP
- > Background operation
- > Fast copying
- > Standardised communication
- > Weight records in the laboratory
- > Weighing data capture and management
- > Automation
- > Weight reading via QR

PLUGINS RETAIL

UPDATE EpeISoft

UpDate EpeISoft

Ref.: 000119091052

Annual Licence

Update to the latest version

Upgrade your PC range with new features, enhanced performance, and an optimised experience.

The TouchScale EVO, TouchScale and K-Scale PC scales evolve with version 3.0, incorporating key improvements in performance, security and usability. With the new UpDate software, your equipment can be updated to the latest version available and benefit from new improvements and services.

Key Features:

- > Annual licence (12 months) and activation per scale
- > Update to the latest version available, always guaranteeing the latest improvements
- > Scales prior to 2025 can be updated. PC range only
- > Ubuntu 24.04 Noble Numbat operating system.
- > Verifactu and No Verifactu system
- > Integration with EuroScale and Jupiter ranges, saving on equipment
- > Unification of working modes
- > Real-time network status, better connectivity and monitoring
- > Ticket splitting, new sales experience for the customer
- > New way of sharing files
- > Card payments (Wordline)

PAYMENT SENSE EpelSoft

Payment Sense - DOJO EpelSoft

Ref.: 000190004418

Annual Licence

Card payment in V3.0 of PC scale

If you are looking for speed, accuracy and ease of payment, we have good news: Epelsa's TouchScale EVO scales now integrate with DOJO, turning them into a payment terminal with no extra steps or manual errors.

The TouchScale EVO, TouchScale and K-Scale PC scales evolve with version 3.0, incorporating new payment methods. With the new EpelSoft Payment Sense software, your team will be able to accept card payments in the fastest way possible.

Key Features:

- › **Direct and error-free payment:** The scales automatically send the amount to the card reader/POS terminal. No need to re-enter the amount, no errors.
- › **Fast payments:** Less waiting at the till, more customers served.
- › **Synchronisation:** Transactions recorded in real time, with sales breakdown and cash control.
- › **Daily payments:** You receive your money in your account every 24 hours.
- › **Reliability:** Cloud technology with no crashes or interruptions.
- › **Easy installation:** Purchase the licence and activate it on the scales.

CONNECTOR EURO-JUP
EpelSoft

Connector
EuroScale-Jupiter
EpelSoft

0000119091073
Perpetual Licence

One PC scale to rule them all

The ideal solution for autonomous weighing with electronic payment integration

Optimise your business with Connector Euro-Jup, the software that enables seamless integration between EuroScale and Jupiter range scales and Epelsa PC models. With this connector, you can manage sales and billing data more efficiently and hassle-free.

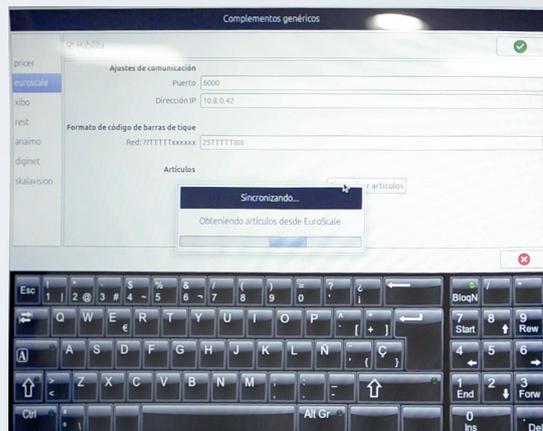

Key Features:

- › Two-way communication between PC scale and EuroScale/Jupiter
- › Automatic receipt and management of tickets
- › Generation of Verifactu invoices from EuroScale or Jupiter records
- › Centralised synchronisation of products from all scales.

TouchScale and EuroScale or Jupiter synchronisation

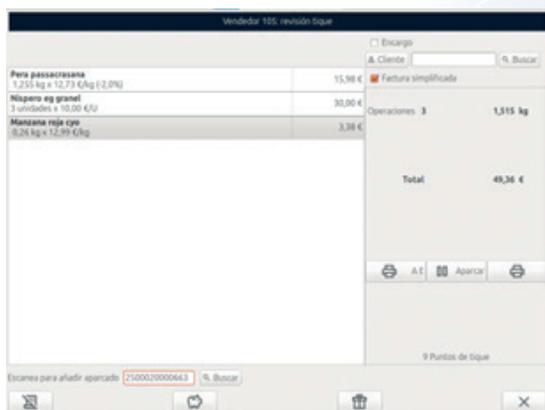

Activando software EpelSoft Connector EuroScale-Júpiter

Synchronisation of items in balance ranges

The item database will be managed directly from the PC range balance; modifications will be sent automatically to the EuroScale/Jupiter balances.

Ticket unification with TouchScale

Scan your EuroScale or Jupiter ticket and you can add new items from ToucScale.

Single ticket with EuroScale or Jupiter

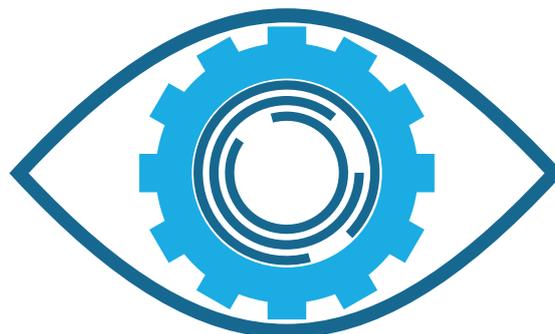

Unified ticket from EuroScale or Jupiter with more items included from ToucScale.

Transactions carried out on our EuroScale/Jupiter scales or network of scales generate receipts with barcodes (EAN13) which can then be read using the scanner on our PC scale. If we want to continue adding lines to the receipt, we can manually add the EAN13 code using the review receipt option and continue with the sale on the EuroScale/Jupiter equipment.

For these receipts to be valid with the new Verifactu and No Verifactu billing system, they will be scanned with the TouchScale scanner and you can continue adding more items or finalise the sale, generating a receipt and an invoice, which will be instantly uploaded to the tax authorities (VERIFACTU mode), or stored as required by law (non-Verifactu).

NOTA: La activación del sistema fiscal, requerirá de una licencia adicional Verifactu.

IMG RECOGNITION EpelSoft

IMG EpelSoft

Ref.: 000119091054

Perpetual Licence

Computer vision software

For product recognition from PC scales

Epelsa's artificial vision system enables TouchScale scales to automatically recognise fruit and vegetables, speeding up self-service and preventing weighing errors. Thanks to machine learning algorithms and neural networks, the scale detects the product placed on the plate and suggests it to the user, simplifying the purchasing process, reducing losses and improving the customer experience.

A solution that learns continuously and locally, without the need for an internet connection or complex configurations. Epelsa's artificial vision turns innovation into a practical, accessible and profitable tool for retail.

Key Features:

- > **Automatic product recognition:** The scale detects the weight, identifies the product using a camera and suggests the most likely options.
- > **Reduction of errors and losses:** Minimises unintentional or malicious errors, improving security in self-service.
- > **Continuous on-site learning:** The system adapts to new products without the need for retraining, even if they change in appearance.
- > **Flexible and without external dependencies:** It can operate without the internet and does not require additional hardware except for the camera.
- > **Easy integration with TouchScale scales**
- > **Compatible with Epelsa's architecture and software,** both in local installation and in a hybrid solution with a server.
- > **Improved user experience.** The identification process is faster, more intuitive and more modern for the end customer.

REDSYS EpelSoft

EpelSoft Redsys (W)

000190004419

Perpetual licence.

Quick and easy integration

Integrated card payment connection in Epelsa TouchScale scales

The REDSYS plugin for Windows environments allows direct integration of bank card payments into Epelsa scales, offering a secure, stable solution that is fully adapted to the Spanish market.

Based on SlimPack-type integration, the system uses the official Redsys library, ensuring regulatory compliance and a smooth user experience, without the need for additional certifications after installation.

Key Features:

- › **Native integration with Redsys:** Direct connection via official library, ensuring compatibility, security, and stability.
- › **Unified user experience:** Customer interaction is managed directly from the Redsys module, without additional development.
- › **Single, perpetual licence:** Activation per scale, with no recurring fees.
- › **Hardware compatibility:** Support for Verifone P400 pinpad connected via USB.
- › **Integrated printing management:** Automatic ticket issuance through the printer configured on the scale.
- › **Simple configuration:** Direct parameterisation of merchant data (code, signature key and terminal number).
- › **Spanish market-oriented:** Specific solution for card payment environments in Spain.
- › **Centralised synchronisation of products from all scales.**

VERSION 3.0 OR HIGHER REQUIRED ON TOUCHSCALE RANGE SCALES

EpelSoft WORLDLINE CARD

EpelSoft Worldline Card

000190004423

Perpetual licence.

Secure and robust payment

Card payment integrated into Epelsa scales

The Worldline Card plugin allows native integration of bank card payments directly into TouchScale scales, connecting them to Worldline payment terminals for secure and efficient management of electronic transactions.

This solution is designed for professional environments that require reliability, control and traceability in collections, allowing payments and refunds to be made from the scale interface itself, with direct communication with the payment terminal. It offers Worldline-certified integration, ensuring compliance with the security and operational standards required by the payment service provider.

Key Features:

- › **Certified integration with Worldline:** Direct communication with Worldline terminals, validated by the provider itself.
- › **Complete transaction management:** Support for card payments and refunds, managed from the scale.
- › **End-of-day control:** Option of automatic or manual end-of-day closing, with associated report generation.
- › **Receipt issuance: Printing of receipts for customers and merchants via the scale or the terminal itself, depending on the configuration.**
- › **Centralised terminal management:** Allows remote operations such as terminal restart, software updates and report queries.
- › **Individual licence per scale:** Activation via specific licence, linked to the equipment serial number.
- › **Professional Linux environment:** Compatible with TouchScale and K-Scale systems under Linux environment, geared towards stable, high-performance installations.

VERSION 3.0 OR HIGHER REQUIRED ON TOUCHSCALE RANGE SCALES

Swiss market.

EpelSoft

CASH DRAWERS

Integration software for cash drawers with TouchScale scales

Epelsa offers a complete range of software solutions designed to directly and securely integrate different models of cash drawers with our TouchScale scales. Each software is designed to facilitate cash management at the point of sale, automating processes and improving traceability and control of operations.

Below, we present the different software connectors available for integration with different cash drawers.

Key Features:

- › Direct integration between TouchScale balances and cash drawers, facilitating automatic control of the drawer from the weighing equipment itself.
- › Synchronised opening with the sale, ensuring automated and secure cash management.
- › Compatibility with different protocols and models of cash drawers.
- › Communication configured using dedicated software or intermediate applications, adaptable to Windows and Linux environments.
- › Centralised management and complete traceability of collections, disbursements and refunds, with automatic recording of operations to improve control and security.
- › Optimisation of customer service time and reduction of human error in the cash collection process.
- › Individual licence per scale, with plugin or associated software for customised control.

Integrated shift management

Connection to Qmatic queue management systems from TouchScale

The Qmatic plugin allows Epelsa scales to be integrated with Qmatic queue management systems, facilitating direct communication with the queue server and orderly customer service management. This solution is designed for retail and assisted service environments where queue management is key, allowing the scale to interact with the Qmatic system and optimise service flows at the counter.

Key Features:

- › **Direct integration with Qmatic Orchestra:** Connection to the Qmatic queue server via Ethernet network.
- › **Queue management from the scale:** Access to call and queue control functions integrated into the sales interface.
- › **Flexible configuration:** Server, company and store parameterisation from the equipment configuration environment.
- › **Optimisation of customer service:** Improves queue organisation and reduces waiting times at the point of service.
- › **Licence per scale:** Individual plugin, associated with each compatible Epelsa device.

EpelSoft QUENDA

QUENDA

EpelSoft c Shift System (Plexus)

000119091071

Multi-channel appointment scheduling and queue management solution

Optimisation of waiting times and efficient service for retail, service and administrative environments

Quenda is a modular platform for managing appointments and shifts that allows you to customise service flows according to the needs of each organisation.

Its multi-channel design makes it easy for users to access and manage their appointments independently and is adaptable to multiple sectors, such as retail.

Key Features:

- › Direct integration with TouchScale EVO scales, allowing shift management to become a natural part of the service flow at the weighing point.
- › Synchronisation of shifts with the sales process, speeding up customer calls from the scale itself and reducing downtime at the counter.
- › Reduction of waiting times and optimisation of customer service resources.
- › Improved user experience and perception of modern and innovative service.

Shift management system and multimedia content

Intelligent shift management with integrated multimedia content

GMedia is shift management software that connects TouchScale and TouchScale XS scales quickly and efficiently. A comprehensive solution that includes a ticket dispenser, shift manager, and multimedia display, all coordinated from a multi-platform environment (Windows/Linux). It improves the customer experience and optimises the flow of service in-store, allowing personalised content to be displayed while customers wait.

Key Features:

- › Centralised queue management from the PC scale itself.
- › Real-time display of queue status and number of customers waiting.
- › Ticket dispensing by section, department or service.
- › Multimedia screen to keep customers informed and entertained.
- › Possibility of displaying advertising, videos and images with the GPubli module.
- › Generation of customer service statistics and reports.
- › Configurable system adaptable to any commercial environment.
- › Compatible with Windows and Linux.
- › Robust solution with specialised technical support.

Weighing technology since 1979

Retail and industrial product

For decades, Grupo EPELSA S.L. has been developing technologies that have revolutionised weighing, its applications and possibilities in countless industries.

Since the founding of the Group's first company in 1979, Grupo EPELSA has been dedicated to the development, manufacture and distribution of electronic weighing equipment, characterised since its inception by sustained growth based on applied research.

Our primary objective is to provide personalised service and attention to our customers. With a qualified team of engineers and technicians, we ensure the integration of our equipment into the customer's technological environment, providing a comprehensive solution rather than just a simple weighing instrument.

Our specialised service has allowed us to position ourselves solidly in the large distribution chain sector, where the technological advantage and quality of service are most evident, as well as to maintain and promote tailor-made solutions aimed at small and medium-sized businesses, which are increasingly demanding in terms of product quality and technical support.

Technical support

FOOD INDUSTRY

Platforms, indicators, labelling solutions, weighing modules, load cells, wall scales, overhead scales, etc.
