Programación de EANs

Código / Nombre: 2 resultados | Página 1/1

Código: EAN8

Nombre: EAN13

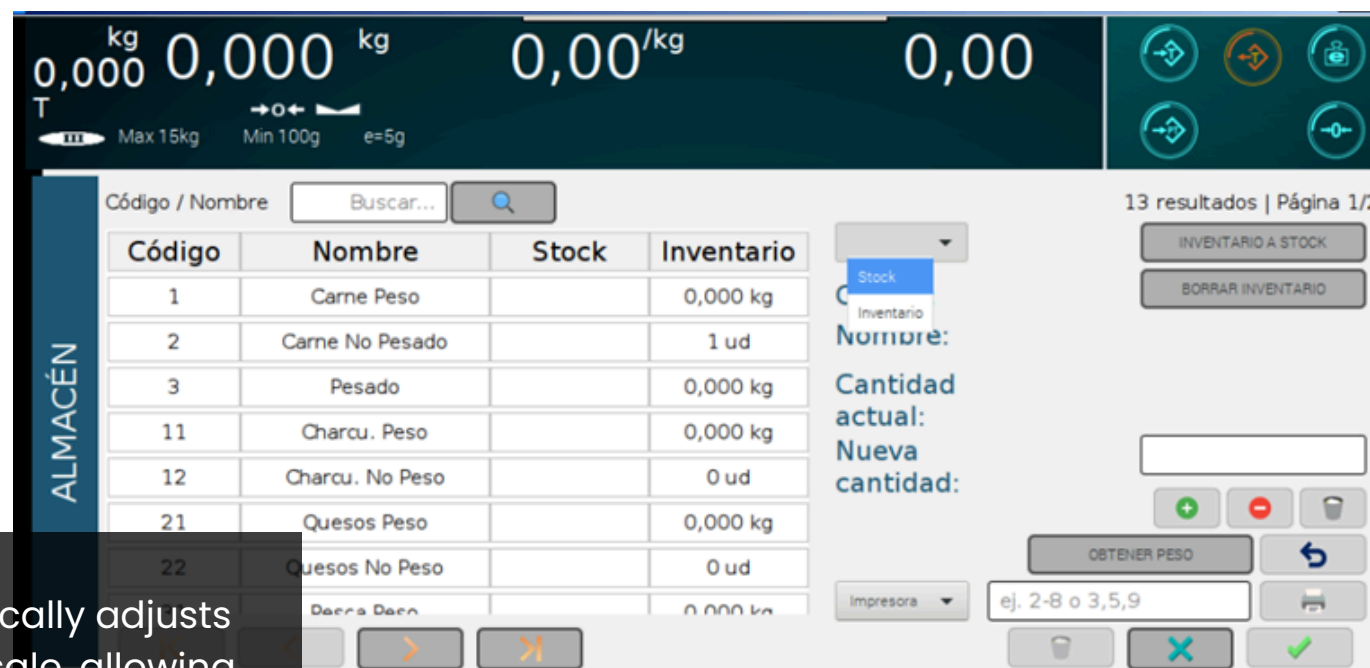

EAN8	EAN13
2823478	012345678912
3323478	333345678912

A maximum of 5 EAN's 8 and/or 13 can be entered for each item. Allows EAN8, EAN13 and CODE128, facilitating the identification, tracking and management of products with different presentations or packaging. Tique content information in QR.

QR also programmable with traditional EAN "masks". Also CODE 128 with traditional "masks".

Stock and inventory control

Bar codes and QR

The screenshot displays the EPELSA inventory control interface. At the top, there are weight indicators: 'kg 0,000 kg' and '0,00 /kg 0,00'. Below this, there are navigation icons and a search bar labeled 'Código / Nombre' with a 'Buscar...' button. The main part of the interface is a table with the following data:

Código	Nombre	Stock	Inventario
1	Carne Peso		0,000 kg
2	Carne No Pesado		1 ud
3	Pesado		0,000 kg
11	Charcu. Peso		0,000 kg
12	Charcu. No Peso		0 ud
21	Quesos Peso		0,000 kg
22	Quesos No Peso		0 ud

On the right side of the interface, there are buttons for 'INVENTARIO A STOCK' and 'BORRAR INVENTARIO'. Below these, there are input fields for 'Nombre:', 'Cantidad actual:', and 'Nueva cantidad:'. At the bottom, there are buttons for 'OBTENER PESO', 'Impresora', and a numeric keypad showing 'ej. 2-8 o 3,5,9'.

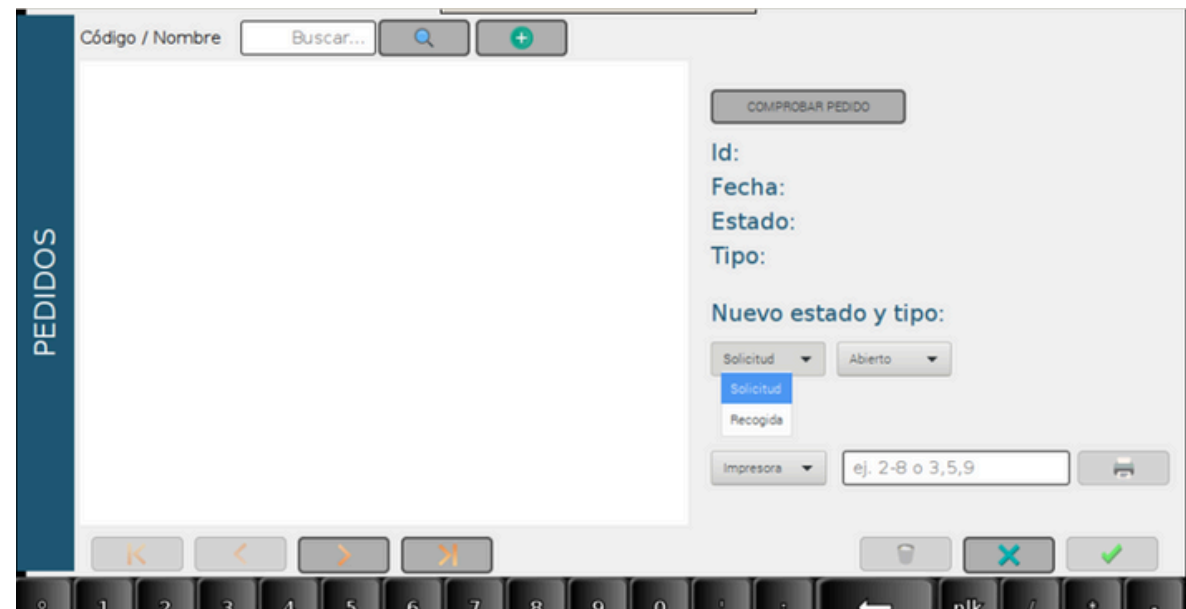

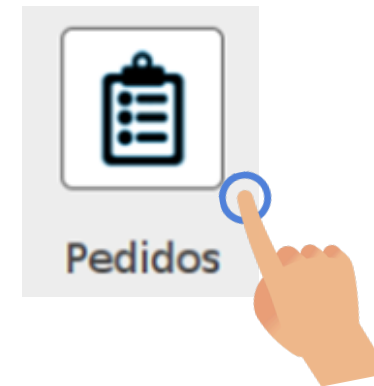

The system automatically adjusts the stock after each sale, allowing to handle negative stocks and to display or list items with available inventory. Product quantities can be assigned manually, both by weight and by unit.

Order management

Order requests

It includes the functionality to manage two types of orders:

- request from the store to the head office
- collection, where the head office indicates the products to be picked up in the store.

The screenshot displays the 'PEDIDOS' management interface. At the top, there is a search bar labeled 'Código / Nombre' with a 'Buscar...' button and a magnifying glass icon. Below the search bar is a large empty area for the order list. On the right side, there is a form for managing orders. The form includes a 'COMPROBAR PEDIDO' button, followed by fields for 'Id:', 'Fecha:', 'Estado:', and 'Tipo:'. Below these fields is a section for 'Nuevo estado y tipo:' with two dropdown menus: 'Solicitud' (with options 'Solicitud' and 'Recogida') and 'Abierto'. At the bottom of the form, there is an 'Impresora' dropdown menu and a text input field containing 'ej. 2-8 o 3,5,9'. The interface is overlaid on a keyboard, indicating it is used on a scale or handheld device.

These orders can be created directly from the scale and managed with statuses such as “open”, “closed” or “cancelled”.

Offer prices

Order requests

The new feature allows you to manage periodic or weekly offers with selection of specific days. Offers can be configured by percentage, such as 2x1 or 3x2 promotions, or adjusted to different price brackets depending on the quantity purchased. You can also apply pricing rules that vary according to weight or units, increasing or decreasing prices in a linear fashion.
