WORKING MODES

RETAIL

TOUCHSCALE XS

 TouchScale XS

grupoepelsa.com

Multifunction

Sales, packaging and self-service modes for better adaptation to various retail needs.

 TouchScale XS

Working modes

With 3 user interfaces.
Families and vendors can be on different pages.

Sales mode

16 Families / 7 vendors / Departments
(Allows quick change of access to Families and Vendors assigned to each Department).

16 Families / 7 Vendors / Favoritos

12 Families / 14 Vendors

Working modes

Simplified management for multiple batch packaging

Automatic and manual packaging mode

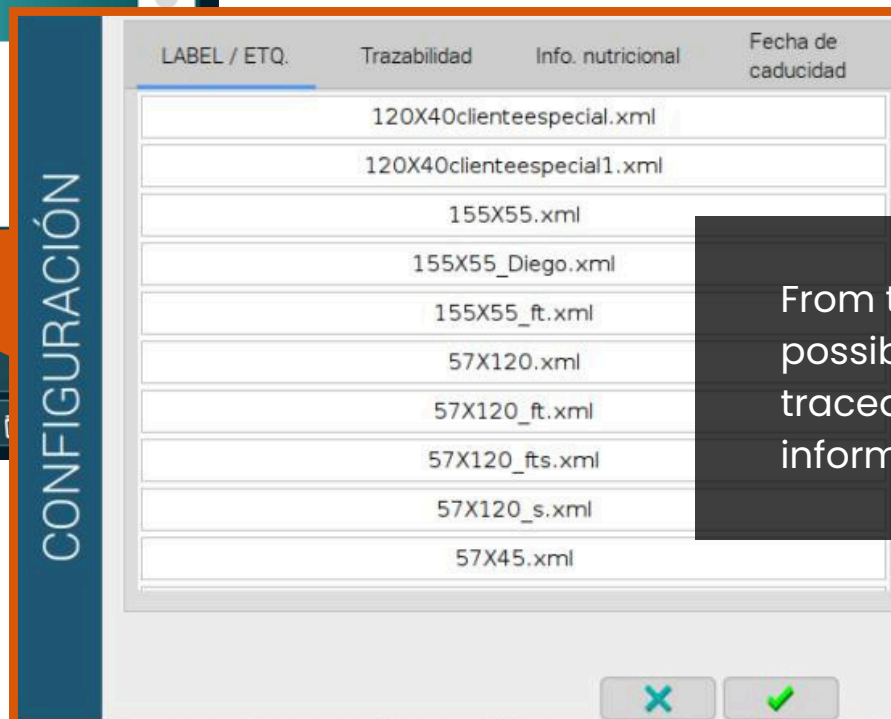

From the same screen we see the different Departments, Families and Vendors, allowing the packaging with different batches and article assigned to the batch for the different Departments (Each Vendor, memorizes its batch and last selected articles).

Working modes

Labels, traceability, nutritional information and expiration dates

Packaging Mode

From the same screen it is also possible to access label selection, traceability, nutritional information and shelf life.

Working mode

Different user interfaces

Self-Service Mode

Families

Families and Item selection

Fixed family

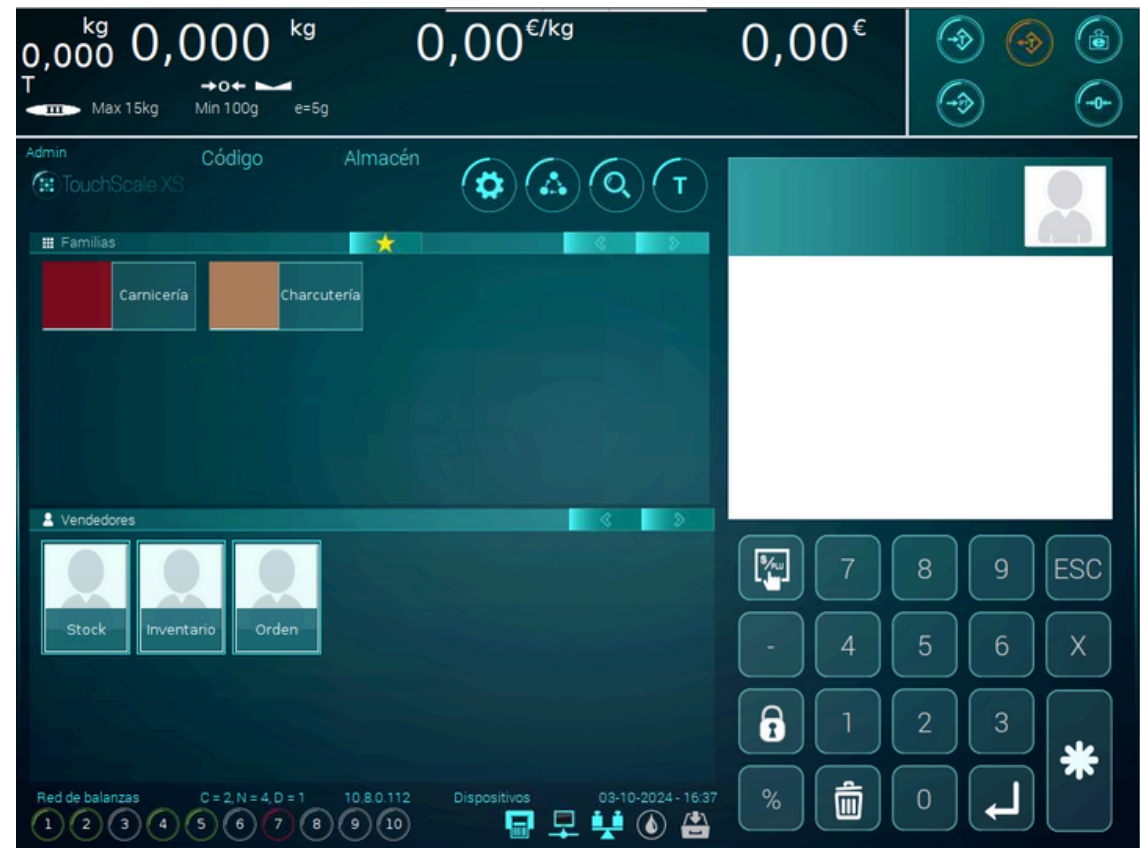

Working mode

Stock and inventory control

Store Mode

The system automatically adjusts the stock after each sale, allowing to handle negative stocks and to display or list items with available inventory. Product quantities can be assigned manually, both by weight and by unit.

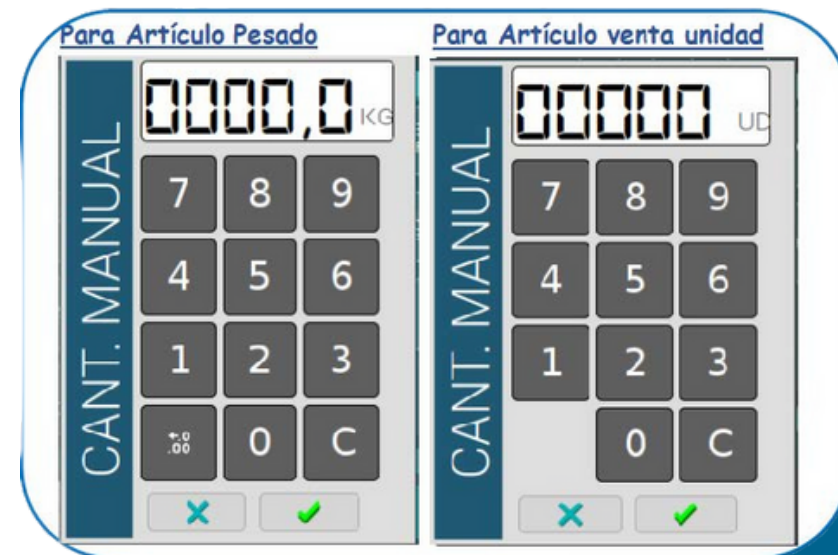

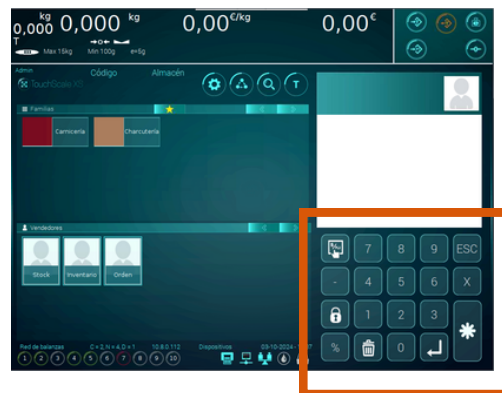

Working mode

Stock, order and inventory control

Store Mode

Stock, inventory and order entry in screen mode with the possibility of manual entry of quantity, or by capturing the deposited weight.

Working mode

Customized modes for each type of operation

The selection of the Scale working mode and type of User Interface is done per Scale, allowing a better adaptation to the needs of each Equipment in the network.
